

Audubon Area Community Services, Inc.
Head Start Program

Community Needs Assessment

2022 - 2023

I. EXECUTIVE SUMMARY

A. Introduction

This Community Assessment is in fulfillment of the requirements of Head Start Performance Standards (45 CFR 1302.11) which requires an assessment of the needs of the communities served every five years. The objective is to provide a snapshot of the service region for Audubon Area Head Start and identify characteristics which may have a significant impact on agency planning and program development.

The Head Start Program Performance Standards and Other Regulations (45 CFR 1302.11 (b)) specify the information that must be included in the Community Assessment and submitted with the grant application.

To summarize, the grantee agency is required to collect and analyze information in the Community Assessment about:

1. The number of eligible children 0-5, and expectant mothers, including their geographic location, race, ethnicity, and languages spoken, including:
 - a. Children experiencing homelessness;
 - b. Children in foster care; and
 - c. Children with disabilities, including types and relevant services/resources provided by community agencies
2. The education, health, nutrition and social service needs of eligible children and their families, including prevalent social or economic factors that impact their well-being
3. Typical work, school, and training schedules of parents with eligible children
4. Other child development, child care centers, and or family child care programs that serve eligible children, including home visiting, publicly funded state and local preschools, and the approximate number of children served;
5. Resources that are available in the community to address the needs of eligible children and their families; and
6. Strengths of the community.

Head Start promotes the school readiness of young children from low-income families through agencies in their local community. The Head Start program is authorized by the Improving Head Start for School Readiness Act of 2007. Head Start and Early Head Start programs support the mental, social, and emotional development of children from birth to age 5. In addition to education services, programs provide children and their families with health, nutrition, social, and other services. Head Start services are responsive to each child and family's ethnic, cultural, and linguistic heritage.

Head Start encourages the role of parents as their child's first and most important teachers. Programs build relationships with families that support positive parent-child relationships, family well-being, and connections to peers and community. Head Start began as a program for preschoolers. Three and four year-olds made up over 80 percent of the children served by Head Start last year. Early Head Start serves pregnant women, infants, and toddlers. Early Head start programs are available to the family until the child turns 3 years old and is ready to transition into Head Start or another pre-K program. Early Head Start helps families care for their infants and toddlers through early, continuous, intensive, and comprehensive services.

Local services are delivered by about 1,700 public and private nonprofit and for-profit agencies. These agencies receive grants from the U.S. Department of Health and Human Services (HHS). Head Start agencies design services for children and families that meet the needs of their local community and the Head Start Program Performance Standards. Some cities, states, and federal programs offer funding to expand Head Start and Early Head Start to include more children within their communities.

<https://eclkc.ohs.acf.hhs.gov/hslc/hs/about>

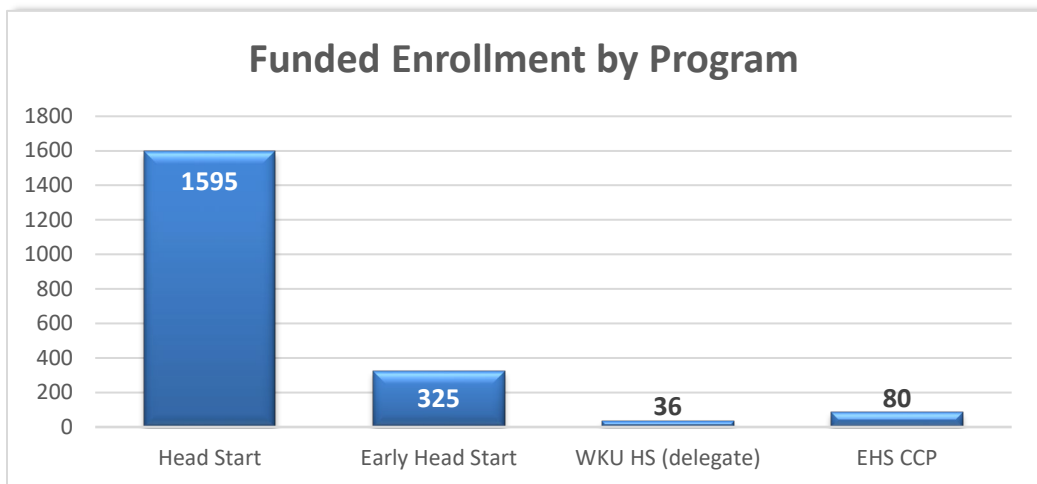

The Head Start Program Performance Standards and Other Regulations (45 CFR 1302.102) state that the information gathered in the Community Assessment (CA) must guide decisions based on the status of eligible families and the community setting(s) within the service area. Specifically, they state that:

The information in the Community Assessment will be used to:

1. Help determine the grantee’s philosophy, and its long-range and short-range program objectives;
2. Determine the type of component services that are most needed and the program option or options that will be implemented;
3. Determine the recruitment area that will be served by the grantee, if limitations in the amount of resources make it impossible to serve the entire service area.
4. If there are delegate agencies, determine the recruitment area that will be served by the grantee and the recruitment area that will be served by each delegate agency.
5. Determine appropriate locations for centers and the areas to be served by home based programs; and
6. Set criteria that define the types of children and families who will be given priority for recruitment and selection.

State of the Grantee

Audubon Area Head Start offers a variety of program models for children from birth to five years old in order to meet the needs of the communities it serves. Audubon is the grantee for the Head Start and Early Head Start programs, which is where most of the children are served. Audubon is also the grantee for the Early Childcare Partnership (EHS CCP) grant which began in August of 2015, and is a delegate for Western Kentucky University (WKU).

Audubon makes available a variety of program options. For example, in the Head Start program, Audubon partners with 18 school districts in all 16 counties of the service area, as well as offering enrollment in stand-alone centers.

In Early Head Start, children ages birth to three may receive services in either center-based full day/full year programs, home based programs as well as a combination of center-based and home based such as our Teen Parenting programs.

Head Start 2022-2023	
Program Option	Classes Available
Double Session	62
Single Session	10
Full Day	53
Head Start Totals	125

Early Head Start 2022-2023	
Program Option	Classes Available
Home-Based	10
Standard Full Day	26
Early Head Start Totals	36

Due to the hardships incurred during the pandemic, modification of the majority of delivery methods, was necessary.

The majority of classrooms utilize the Creative Curriculum as their curriculum, and all classrooms use the Teaching Strategies Gold Assessment System as their ongoing-assessment tool. The curriculum and assessment work in conjunction to help teachers prepare meaningful activities based on children’s interests as well as their individual levels of development. The curriculum is also aligned with the Kentucky Early Childhood Standards to ensure the skills assessed are the most important skills in preparing children to enter into the K-12 system.

As of June 1, 2023, in the 2022-2023 Program Year, Head Start and Early Head Start have served a cumulative total of 2,286 children. The Head Start program has served 1,715 children while the Early Head Start program has served 435 children, including 21 Pregnant Mothers served.

These programs, although diverse in scheduling and approach to service delivery, share the common goal of preparing children to be ready to enter kindergarten - academically, physically, and socially.

The mission of Audubon Area Head Start is as follows:

The mission of Audubon Area Head Start is as follows:

- Excitement in children through learning
- Empowerment in families through strengths
- Enhancement in communities through participation
- Enrichment in staff through experiences

Each of the components of the mission statement is accompanied by the following outcome statements:

- All participating children will be excited about learning and equipped with appropriate skills based on their individual needs.
- All participating families will be empowered with the ability to identify their needs and build upon their strengths to achieve their goals.
- All communities served by Head Start will be enhanced through ongoing collaborations and by the active participation of families.
- All staff will be enriched with a sense of accomplishment both professionally and personally through their Head Start experience.

Service Area

Caldwell County	Hancock County	Lyon County	Todd County
Christian county	Henderson County	McLean County	Trigg County
Crittenden County	Hopkins County	Muhlenberg County	Union County
Daviess County	Livingston County	Ohio County	Webster County

Our central office is located in Daviess County at:

Audubon Area Community Services Inc.

Head Start Program (2nd Floor)

1700 West Fifth Street

Owensboro, KY 42301

B. Methodology

A Head Start Community Assessment not only fulfills a federal requirement, it becomes the cornerstone of the program's evaluation and planning process. Every five years the program conducts a comprehensive collection and analysis of key indicators to evaluate the needs and characteristics of eligible Head Start/Early Head Start children and families. Once the comprehensive analysis is complete, an update is written annually for the next four years and becomes the synopsis of current community needs, and is used to: design new plans, choose additional community partners, develop strategic collaborations, evaluate progress of past recommendations, and make relevant decisions about program improvement changes expeditiously.

Multiple sources of quantitative and qualitative data were utilized in the creation of this Community Assessment. The community assessment methodology focuses on different levels of analysis to further enhance Head Start program staff understanding and optimize services to children and families.

- 1) **Quantitative data** included governmental statistics such as: 2000 & 2010 decennial census, American Community Survey, Current Population Survey, Federal Reserve, Bureau of Labor Statistics, USDA Rural Atlas, along with numerous state, local and agency databases.
- 2) **Qualitative data** was used in the form of surveys of current Head Start parents and families which is conducted biannually by the Family and Community Services team. The results are analyzed by geographic location in our service area to quantify the level of satisfaction within the program and highlight those areas which may need to be strengthened.

The Community Assessment Update was researched and updated by William Logsdon, Data Analysis Specialist for Audubon Area Head Start.

C. Identification & Prioritization of Issues or Problems

Once data was compiled and collected for each of the 16 counties in our service area, a thorough review of the findings was conducted.

Challenge: Extending Duration of Services

Current research links increasing the length of the program day and program year to improved children's outcomes. Research suggests that attending high-quality full school day and full school year care is particularly important for low-income children to succeed in kindergarten and beyond. Based on this research, the Head Start Program Performance Standards (45 CFR 1302.21 (c) (2)), released September 2016, established standards of a minimum of 160 days per year for programs attending 5 days per week, or at least 128 days per year for 4 day programs.

This also established the required 1,020 hours of planned class operations over the course of at least eight months per year for at least 50 percent of its Head Start center-based funded enrollment by August 1, 2019, and 100% by August 1, 2021. This has led to some extension of both the program day and the program year.

As of January 30, 2020, the Office of Head Start authorized the lowering of the required percentage of center-based funded enrollment slots for which Head Start programs must provide 1,020 annual hours of planned classroom operations, from 100% to 45% of a Head Start program's center-based slots.

This translates to a minimum 718 of the 1595 Head Start funded enrollment slots that need to be provided the 1,020 annual hours of planned classroom operations. AAHS has been in full compliance since the 2021-2022 academic year and will continue to ensure students are receiving the required 1,020 annual hours of planned classroom operations.

Extending the duration of services to a minimum of 1,020 hours has created some major challenges for our program over the past few years, to include:

- **Facilities:** The need for more classrooms has been the largest hindrance. With the majority of our double-session classrooms being located in already crowded elementary schools, the ability to convert/add new classrooms is sometimes impossible. This creates a tremendous challenge for our program.
- **Qualified Teachers:** This challenge will be addressed in more detail below, however it is important to note that extending duration of services for our children in double-session classrooms, would of course require additional teaching staff for the additional rooms. Once teachers and teacher associates are hired, additional challenges will arise such as ensuring all staff are adequately trained on components of the program such as the CLASS tool and the curriculum. Additionally, the number of support staff for teachers (i.e. Education Specialists) would create a challenge for our program. Currently each Education Specialist has an average case load of twenty-five classrooms.

- **Additional Challenges:** A multitude of additional challenges such as transportation, meal service, and adequate planning time for teachers will need to be addressed when considering how to extend duration of services.

Recommendations: Extending Duration of Services

- Use the information from this current Community Assessment to identify areas to begin transitioning to full day/school year program models.
- Communicate with school district personnel to discover which districts have space available and are willing to convert to the full day/school year model.
- In cases where districts are unable or unwilling to extend duration of services, consider other alternatives to serving Head Start children in those districts or reassign the slots available depending upon need and availability of facilities and qualified classroom staff.
- Research and locate additional facilities for the additional classrooms that will be needed.
- Develop a comprehensive plan for extending duration of services to ensure compliance with regulations:
 - Timeline for converting 100% double session classrooms to full day/school year
 - Onboarding plan for new teachers and teacher associates
 - Plans for hiring additional support staff for teachers (i.e. Education Specialists)
 - Plans for addressing transportation, meal service and planning time for teachers.
 - Address the need to better compete with local school districts for better recruitment and retention of qualified teachers to fill the slots and hours needed.
 - Convert classrooms from double session to single session classrooms, reducing the need for classrooms.

Challenge: Qualified Teacher Shortage

The conversion to full day/school year programming would require additional classrooms to be staffed which includes Lead Teachers and Teacher Assistants to be hired over the next two years. It is important to note, that this number does not take into consideration the number of districts who may be unable or unwilling to convert to the full day/school year model which would increase the need.

Even without transitioning to the full day/school year program model, there is evidence of a shortage of qualified teachers in our service area. A report released by the U.S Department of Education, Office of Postsecondary Education in March of 2015 indicates a shortage of Interdisciplinary Early Childhood Education teachers for the 2015-2016 school year. Additionally, a report released in October of 2012 by the Kentucky Legislative Research Commission, shows 1.4 ratio of individuals completing early childhood programs to projected vacancies between the years of 2008 and 2012. The reports also noted that turnover for teaching staff is significantly higher in classrooms that have a high percentage of students in

poverty. Neither of these reports take into consideration the effects of converting to a full day/school year programming model.

Recommendations: Qualified Teacher Shortage

- Explore budgeting options which will allow for a more comparable rate of pay for Head Start teachers and District Pre-K teachers. Many times these teachers leave to go work for the school district due to higher salaries offered by the districts.
 - Address the need to better compete with local school districts for better recruitment and retention of qualified teachers to fill the slots and hours needed.
 - Continue to improve wages/salaries and strive to recruit qualified individuals from colleges/universities, before graduation or shortly thereafter.
- Partner with area colleges and universities to actively recruit graduates from Early Childhood programs. (preferably before they graduate)
- Study patterns in teacher turnover to identify trends to be addressed.
- Partner with local colleges to create an internship program for those students who plan on entering the early childhood profession.
- Create a pathway for our current classroom staff that are not Lead Teachers to advance through the personnel ranks with the ultimate goal of becoming a Lead Teacher.
- Continue Conscious Discipline Academy, whose graduates can continue to teach some best practices to their colleagues, to help all staff to better handle issues that arise in the classroom.
- Utilize the Learning Lab for a successful orientation of new teachers and aides.
 - The Learning Lab is a learning community where staff attend an intensive training seminar for three weeks. These trainings are conducted face to face, on-line, and through actual classroom shadowing. The goal is for staff to be “classroom ready” by attending the following training topics:
 - Creative Curriculum
 - Childplus
 - Conscious Discipline
 - Classroom Environment
 - Teaching Practices
 - CLASS/MERIT
 - Lesson Planning/Individualization
 - Disability Services
 - Teaching Strategies

Challenge: Access to Dentists

The data available regarding the access to dentists in our service area was truly surprising. It has been an ongoing struggle to meet the health performance standards as they relate to dental exams and treatment. The following chart speaks for itself and the severity of the shortage of dental providers. The chart represents the number of dentists in each county, relative to the population.

There is a wide variance in the data as we compare the ratio of each county. Christian County has the highest access to dentists and ranks extremely well relative to the state of Kentucky. However, most of the 16 counties in the service area, have a serious lack of dentists locally.

Population per Available Dentist - 2015		
County	# Dentists	Ratio
Todd	1	12295:1
McLean	1	9475:1
Livingston	1	9269:1
Crittenden	1	9188:1
Trigg	2	7132:1
Webster	3	4439:1
Ohio	6	4063:1
Lyon	2	4035:1
Caldwell	4	3142:1
Muhlenberg	10	3103:1
Union	6	2480:1
Hopkins	21	2186:1
Henderson	24	1927:1
Hancock	5	1762:1
Daviess	58	1719:1
Christian	115	629:1

Population per Available Dentist – 2023		
County	# Dentists	Ratio
Todd	1	12,285:1
McLean	1	9,100:1
Livingston	1	8,959:1
Crittenden	1	8,947:1
Trigg	2	7,096:1

Hancock	6	1,511:1
Christian	122	593:1

* <https://www.countyhealthrankings.org/explore-health-rankings/kentucky/data-and-resources>

Unfortunately, the reality is much worse than the data appears. All too often dentists do not provide services to the very young unless they specialize in Pediatric Dentistry. Another issue is the fact that many dentists do not accept Medicaid for payment which narrows the available options even more.

Another barrier is if the parents/family of a child are not on Medicaid, but have private health insurance, many times they do not have dental insurance. We already utilize UK Dental, when possible, but it is apparent we need some new and creative approaches.

Recommendations: Access to Dentists

- Expand our search into new areas in order to contract with dentists
 - While recruiting dentists to partner with, become more visible and nurture the relationship with the dentist and his staff.
- Increase parent/family education regarding the importance of dental hygiene at a young age
- Community Partnerships Program
 - The following suggestions came from: “Working with Health Professionals to Improve Access to Oral Health Care” from National Maternal & Child Resource Center for Oral Health
 - Partner with community organizations (for example, community health centers, dental clinics, WIC, health departments, dental schools and societies, and dental hygiene schools and societies) to promote oral health concepts and address oral health issues.
 - Involve oral health professionals in our Health Services Advisory Committee (HSAC) to promote community linkages.
 - Build relationships with oral health professionals; inform them about the oral health needs and barriers to care for pregnant women, infants, and children enrolled in Head Start.
 - Invite oral health professionals to visit our program to meet staff and children and their families.
 - Recognize oral health professionals who provide care for children enrolled in our program.
 - Provide certificates of appreciation and/or program materials (for example, photographs or thank you letters from children and their families) that can be displayed in the dental offices.
 - Develop press releases describing the oral health professionals’ contribution and submit the releases to local media.

*** In 2011, the Kentucky Early Learning Leadership Network (ELLN) compared the KY Early Childhood Standards, the KY Core Academic Standards, with the Kindergarten Brigance Screening Tool used by the state of Kentucky to determine Kindergarten school readiness. The ELLN discovered a significant gap between the expectations for exiting preschool criteria and Kindergarten entry level criteria being assessed by the Brigance Screen. A more in-depth review of the KY Core Academic Standards, concluded some skills screened by the Brigance tool, for Kindergarten entry, were listed as exiting criteria by the KY Core Academic Standards for Kindergarten.

Source: Kentucky Housing Corporation

<https://www.kyhousing.org/Data-Library/Pages/K-Count-Results.aspx>

Every year, KHC conducts a K-Count to best monitor the homeless situation in Kentucky. The U.S. Department of Housing and Urban Development (HUD) requires such a count every other year, but KHC believes it best serves the people of Kentucky to conduct this count yearly.

Results of the K-Count demonstrate the need for resources for housing and services for homeless persons in each community. The K-Count also helps determine how much federal funding will be awarded from HUD for homeless programs. In addition, the K-Count helps assess progress under Kentucky's Ten-Year Plan to End Homelessness and provide important information for updating the plan.

Employment of speech-language pathologists is projected to grow 25 percent from 2019 to 2029, much faster than the average for all occupations. As the large baby-boom population grows older, there will be more instances of health conditions that can cause speech or language impairments, such as strokes or dementia.

Caldwell County

1) Brief History

Originally a part of Livingston County, Caldwell County was formed on January 31st, 1809. The fifty-first county in order of formation, Caldwell County is named in honor of John Caldwell, who served as Lieutenant Governor of Kentucky and participated in the George Rogers Clark Indian Campaign. Caldwell was also the first western Kentuckian to be elected to the Kentucky state Senate.

Caldwell County's economy has been based upon agriculture since its settlement and the primary crop was dark-fired tobacco. Due to its strategic location for exporting tobacco through the port of New Orleans, in 1860 Caldwell County ranked sixth among Kentucky counties in the production of tobacco. In the early 1900's the county was at the center of a farmers' revolt against monopolistic tobacco processors and manufacturers, known as the Black Patch War.

In the late 1800's Kentucky's railroads played a major role in the growth of Princeton. Train and maintenance crews were assembled there at the large railroad yard and a roundhouse existed to maintain the steam locomotives. With the building of interstate highways, the Princeton area has remained an important transportation center for western Kentucky with the Western Kentucky Parkway intersecting I-24 just to the west of the town. In the mid-twentieth century, Caldwell County began to shift from agriculture to industrialization. Caldwell County is still largely agricultural, however it is also home to factories such as Bremner, who are the largest private cookie and cracker factory in North America.

2) Geographical Description

Located in the Pennyroyal region of western Kentucky, Caldwell County has a total land mass of 357 square miles. Caldwell County is bordered by Crittenden, Webster, Hopkins, Christian, Trigg and Lyon Counties. The largest city in Caldwell County, Princeton, also serves as the county seat.

Caldwell County has a diverse topography. Portions of southern and western Caldwell County lie on a well-developed sinkhole plain that extends eastward to the Bowling Green area of south-central Kentucky. Sinkholes, sinking creeks, springs, and other features associated with underground drainage in a limestone terrane are found here.

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Pre & Post Assessment with Families			
Assessment	1	2	+/-
Employment & Job Skills	3.3	3.3	-
Money Management	3	3.1	▲0.1
Safe and Stable Housing	4	4	▲0
Transportation Access	3.9	4	▲0
Medical, Dental & Vision Care	4	4	-
Mental Wellness	3.8	3.8	▲0
Nutrition	2.3	2.5	▲0.1
Parenting Practices	3.9	4	▲0.1
Actively Involved with Child	2.9	3.3	▲0.4
Language Development	3.4	3.9	▲0.5
Parent as Educator	2.6	3.4	▲0.8
Adult Education	2.1	2.1	▲0
Transitional Services	3.6	3.8	▲0.2
Support Network	3.3	3.3	▲0
Civic/Community Involvement	2.5	2.7	▲0.2
TOTAL	48.7	51.2	▲2.5

9) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Community

- Quality of basic education
- Funding for basic education
- Providing basic hospital services
- Creation of jobs
- Increasing the number of students going on to college or trade school
- Recruitment of manufacturing firms to the region
- Availability of job training opportunities
- Alternatives for high school drop outs & other at risk youth
- Attracting young professionals to the region
- Small business assistance

Others issues mentioned in the “write in section” of the Community Issues Survey included the following. These are not listed in any priority:

- Improving housing (all income levels)
- Enforcement of traffic speed limits
- Assistance for homeless and transients
- More quality rental property
- Develop more condos
- Condemn dilapidated rental housing
- Enforce property code violators on environmental issues
- More upkeep is needed on vacant property

Christian County

1) Brief History

Formed from a portion of Logan County by the Kentucky General Assembly in 1796, Christian County is named in memory of Colonel William Christian. Col. Christian, a native of Augusta County Virginia, and a veteran of the American Revolution, settled on Beargrass Creek near Louisville in 1785 and was killed by Native Americans in southern Indiana the following year. Originally, the county included all land north of the Tennessee line, west of Logan County and the Green River, south of the Ohio River and east of the Tennessee River.

The first permanent settlement in the county was made around 1784 when James Davis and John Montgomery brought their families by flatboat down the Ohio River and then up the Cumberland River to settle on Montgomery Creek, southeast of present-day Pembroke. There the settlers built a log blockhouse on land where they hunted and farmed. From there, settlement occurred more to the northern region of the county where its ample supply of fresh water, wild game and timber made it an ideal location for settlers.

In recent years, Christian County and Hopkinsville have been successful through their Economic Development Council, in recruiting new industries into the area. In addition to the original Hopkinsville Industrial Park located on the Pembroke Road, there is a newly expanded Commerce Park which lies just north and west of Pembroke, Kentucky. While automotive parts still make up the bulk of finished goods, in the older Hopkinsville Industrial Park, industries in Commerce Park are more varied. Products leaving the plants range from ink at Sun Chemical to plastic packaging material at F.P. International and pancake mix at Continental Mills.

2) Geographical Description

Located in the Pennyroyal Region of southwestern Kentucky, Christian County has a total land mass of 722 square miles and is the second largest county in the state. Christian County is bordered by Hopkins, Muhlenberg, Todd, Trigg and Caldwell counties and by the state of Tennessee.

The topography of the county varies greatly between the northern and southern portions of the county. The southern portion is flat and fertile making it ideal for farming, while the northern portion of the county is hilly and contains much timber.

Hopkinsville, the county seat, is also the largest city in Christian County. The Fort Campbell Army Post, home of the 101st Airborne, is situated both in the southern portion of Christian County and the northern portion of Montgomery County, Tennessee.

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Pre & Post Assessment with Families			
Assessment	1	2	+/-
Employment & Job Skills	3.1	3.4	▲0.3

Support Network	3.4	3.5	▲0.1
Civic/Community Involvement	2.5	2.7	▲0.2
TOTAL	50.5	52.2	▲1.7

9) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Community

Job opportunities and recreational activities are two of the areas needing the most attention and improvement. Only 28% of residents surveyed felt that there are enough job opportunities in Christian County. Over half of the people surveyed do not think there are enough recreational activities for adults, kids, or families.

Identified Community Strengths

- Clean and attractive community
- Safe place to raise a family
- Good quality of life
- Sense of community pride

Identified Needs due to Behavioral/Social Factors:

- Obesity
- Poor dietary habits
- Lack of physical activity
- Prevalence of smoking
- Unintentional injury and/or deaths
- Teen pregnancy
- Sexually transmitted disease
- Prevalence of alcohol and drug abuse

Crittenden County

1) Brief History

Founded April 1, 1842, Crittenden is the state's ninety-first county and is named after John Jordan Crittenden, a former senator and governor of Kentucky. Originally a part of Livingston County, it was first settled by James Armstrong of South Carolina. He arrived in the Fredonia Valley area in 1786, where he built a cabin and was joined by his family in 1791. By then many other families had moved into the area, most being of English, Scotch, and Irish descent.

The first county seat was the Crooked Creek community where the first court was held at the home of Samuel Ashley. In 1844 the county seat was moved a few miles south to Marion, where John S. Gilliam donated land for the public buildings. In the 1840s Marion was an industrial town with the largest fluorspar mine in the country. However, the fluorspar industry peaked in 1947 and has since greatly declined due to competition from imported fluorspar.

The county has a strong agricultural economy, the major crops and livestock being corn, wheat, soybeans, alfalfa, cattle, and hogs. Other products include lumber, modular homes, glass products, and the blue crystal made famous by Ball canning jars.

2) Geographical Description

Crittenden County is located in the western portion of the Pennyroyal region in the southwest portion of the state. It is bordered by the Ohio River as well as Union, Webster, Caldwell, Lyon, and Livingston Counties and has a total land mass of 360 square miles.

The terrain is characterized by rolling hills and elevations ranging from 334 feet above sea level in the lowest areas on the Ohio River to 834 feet above sea level in the Ridglands. The county is drained by the Crooked Camp, Hurricane, Livingston, and Piney creeks and by the Cumberland, Tradewater, and Ohio rivers. One-third to three-eighths of the 360-square-mile county is wooded, with a wide variety of trees ranging from white oak to wild cherry. The county has valuable deposits of natural resources including fluorspar, zinc, oil, aluminum, porcelain, coal, limestone for gravel, and sand for glass making.

939	9	183	X	X	35	

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Pre & Post Assessment with Families			
Assessment	1	2	+/-
Employment & Job Skills	3.5	3.7	▲0.2
Money Management	3.3	3.6	▲0.4
Safe and Stable Housing	3.7	3.8	▲0.1
Transportation Access	3.8	3.9	▲0.1
Medical, Dental & Vision Care	3.8	4	▲0.2
Mental Wellness	3.7	3.7	-
Nutrition	2.7	2.7	▲0
Parenting Practices	3.6	3.7	▲0.1
Actively Involved with Child	3.3	3.4	▲0.1
Language Development	3.1	3.4	▲0.3
Parent as Educator	3	3.4	▲0.4
Adult Education	2.2	2.2	▲0
Transitional Services	2.5	3.8	▲1.3
Support Network	3.4	3.6	▲0.2
Civic/Community Involvement	1.5	2.2	▲0.7
TOTAL	47.2	51.1	▲3.9

9) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Community

Health needs in the community:

- Obesity
- Cancer Rates
- High smoking rates
- Access to mental health services-currently poor structure for mental health/substance abuse
- Lack of counseling for patients and families regarding mental health
- Population is getting older – issues related to aging population (Alzheimer's, need for specialized care, etc.)

Daviess County

1) Brief History

Daviess County, the fifty-eighth county in order of formation, was formed out of Ohio County on January 14, 1815. Daviess County is named for named for Major Joseph Hamilton Daveiss (a recording error in the State Clerk's office accounts for the error in spelling, which was never corrected), the United States Attorney who unsuccessfully prosecuted Aaron Burr.

William Smeathers (Smothers) settled at Yellow Banks, later Owensboro, in 1797 or 1798, about the time that Valentine Husk settled at Pup Creek. Other settlers were attracted to the healthy, well-drained hill country between Pup Creek and Blackford, especially along the many Indian trails that bisected this region, such as the Elizabethtown-Shawneetown trail. Another led from Iceland Landing on the Ohio to the town of Hartford in Ohio County. Yelvington, at the intersection of these two trails, became the first settlement in Daviess.

Originally most of the county was timbered, and woodworking industries thrived in the nineteenth century. Some timber remains as an exploitable resource, but with the draining of the Panther Creek bottoms in the 1920s, the main area for timber exploitation was clear-cut and converted to agricultural use. Coal mining began commercially in the 1880s, and Daviess County became a major producer with the development of strip mining technology in the 1950s, with production peaking in the mid-1980s. Sand and gravel from the bed of the Ohio River are other major resources of the county. Daviess County also has long had a reputation as the leading center of the production of distilled spirits, chiefly Kentucky bourbon.

The county is served by several county parks and recreation areas, including the Ben Hawes State Park. The Owensboro-Daviess County Airport is operated by both city and county governments. The county government also contributes to such facilities as the Owensboro Area Museum and Owensboro Museum of Fine Arts.

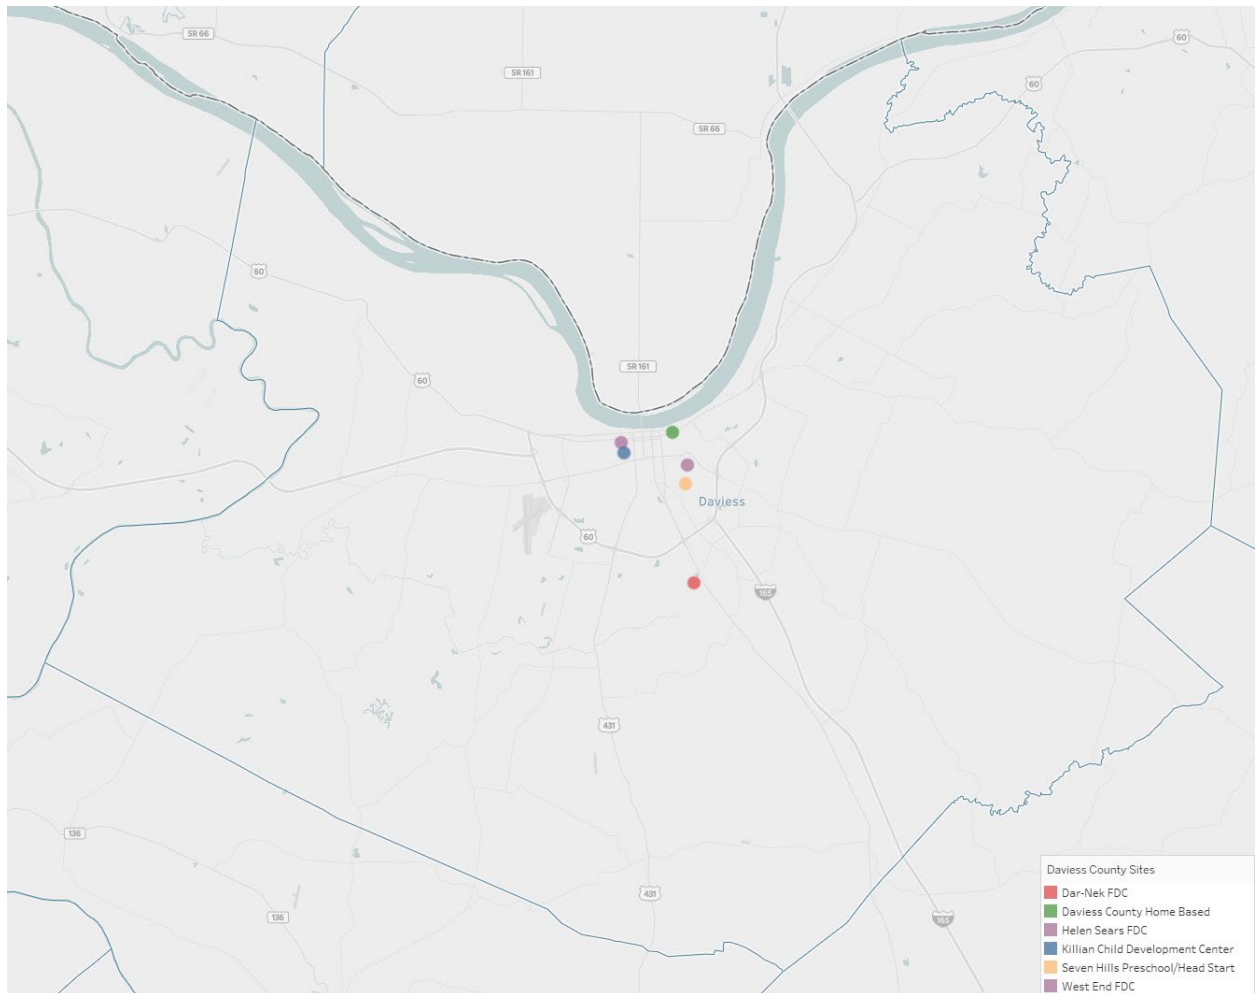

2) Geographical Description

Daviess County measures 463 square miles, making it eighteenth in size in the commonwealth. The county seat is Owensboro. The county is bordered by Hancock, Ohio, McLean, and Henderson Counties as well as the state of Indiana via the Ohio River.

The northern half of the county along the Ohio River is relatively flat, with a few rolling hills dotting the landscape. The southern portion is mostly rolling hills mixed with flat valleys. The southern portion was mined for coal in the past, especially in the rolling hills along Panther Creek and other streams.

11,706	263	2,846	145	8.6%	339

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Pre & Post Assessment with Families			
Assessment	1	2	+/-
Employment & Job Skills	3.1	3.3	▲0.2
Money Management	3.1	3.3	▲0.2
Safe and Stable Housing	3.4	3.6	▲0.2
Transportation Access	3.7	3.8	▲0.1

Support Network	2.9	3.2	▲0.3
Civic/Community Involvement	2.1	2.4	▲0.3
TOTAL	46.6	49.2	▲2.5

9) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Community

Strengths:

- Strong faith based communities
- Comforting sense of close knit communities
- Quality school systems
- The Farmer's Markets are utilized
- The kids and the communities are safe overall
- General access to fitness, recreational and athletic activities
- Largely interested in Green River District Health Departments programs and community involvement
- Low wage towns with low costs of living

- General access to HealthCare
- Low violent crime rate
- Strong and effective community coalitions

Challenges:

- Substance and alcohol abuse are increasing among adults and the youth
- College graduates not returning home to find jobs and build the economy (brain drain)
- Little to no presence of mental health providers
- Increase in unemployment due to mine closures
- Fear of communication barriers due to the diversifying population
- Lack of knowledge on how to access healthcare services
- Rise in single parent families
- Fear that E-cigarettes are enticing new smoking habits and hindering the smoke-free process

Hancock County

1) Brief History

Hancock County, the eighty-third in order of formation, was formed on January 3, 1829, from parts of Ohio, Breckinridge, and Daviess counties and named in honor of John Hancock, president of the Continental Congress and signer of the Declaration of Independence. Hawesville, in the northern part of the county along the Ohio River, has been the county seat since 1829.

Settlement began about 1799, with pioneers arriving by flatboat along the Ohio River or by trails leading from Elizabethtown and Louisville through Breckinridge County and along the ridgelines to Owensboro and beyond. During the 1850s, coal mines were opened in Hawesville and cannel coal deposits were developed in Bennetsville. A railroad was built from Bennetsville to haul cannel coal to Cloverport for shipment to New Orleans and from there to England. A rail line also led from the Hawesville mines to the river. Miners from Britain and Germany were attracted to these jobs.

The building of the Louisville, Henderson, & St. Louis Railroad (now part of CSX Transportation) through the county, completed in 1888, stimulated the coal mining and timbering industries, and furnished additional markets for Hancock County's farmers. Beginning in the 1950s, an economic transformation occurred in Hancock County, turning it from a depressed agricultural area into one of the most industrialized rural counties in Kentucky.

2) Geographical Description

Hancock County is bordered by Daviess, Ohio, and Breckinridge counties as well as the state of Indiana and has an area of 189 square miles. Limestone underlies the eastern and southeastern part of the county, with frequent outcroppings such as those at Jefferies Cliffs. Bottomland covers much of the northern and northwestern part of the county. Several veins of bituminous coal are found in these formations, and in the southeastern part of the county are rich deposits of cannel coal.

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Henderson County

1) Brief History

Henderson County, the thirty-eighth county in order of formation was formed in 1798 from a section of Christian County and named to honor Col. Richard Henderson, founder of the Transylvania Company. In 1778 the heirs to Henderson's company were granted 200,000 acres of land in what would become Henderson County by the Virginia House of Delegates. Members of the company were among the area's settlers beginning in 1798. The seat of Henderson County is the city of Henderson.

The first settlement in the county occurred around 1791 at what was then called Red Banks, the future site of the city of Henderson. With the establishment of Henderson County in 1798, and a county court system the next year, the area became generally peaceful. By 1800 the population of the county had increased substantially, and numerous grist and carding mills were built.

The city of Henderson experienced industrial growth during World War II and the years afterward, while the rest of the county was engaged in oil or coal production or remained agricultural. By 1989, bituminous coal and lignite mining was a leading employer in the county.

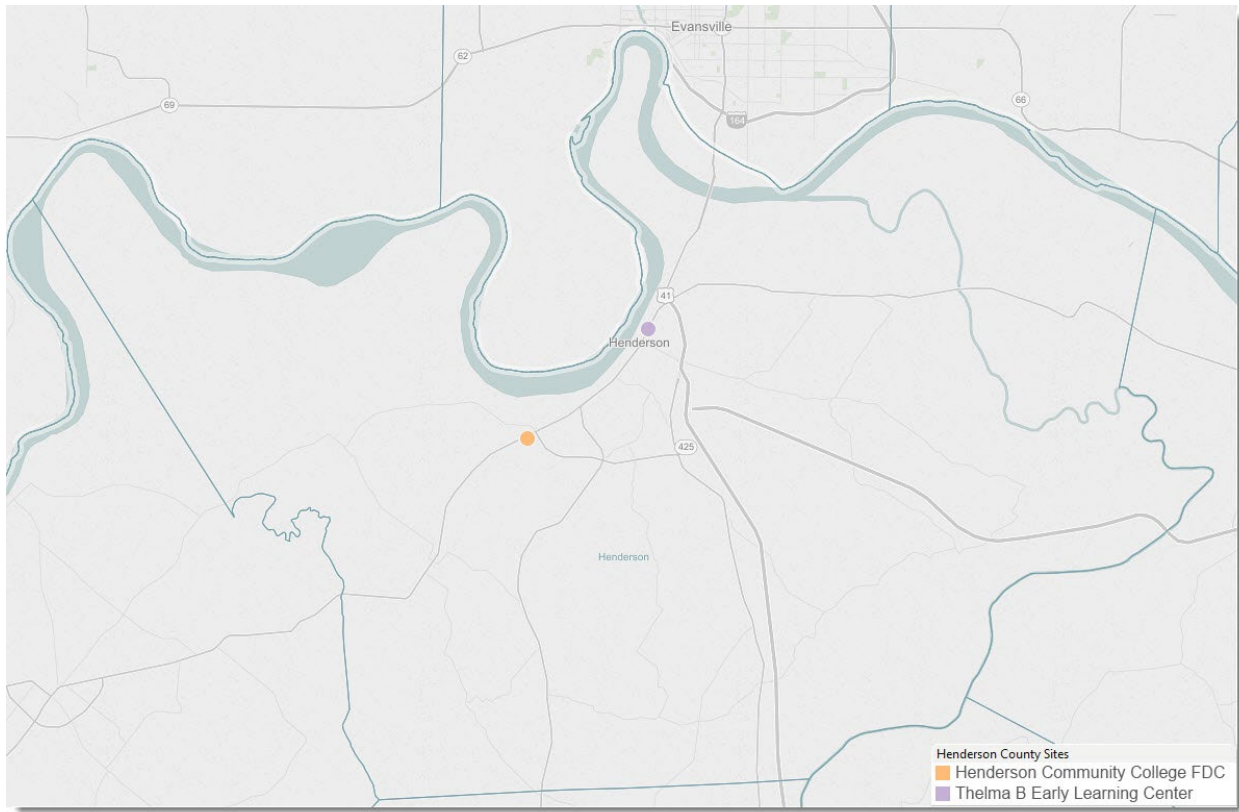

2) Geographical Description

Located in western Kentucky along the Ohio River, Henderson County is bordered by Daviess, McLean, Webster, and Union counties and has an area of 438 square miles. A change in the river's course has isolated a small portion of the county on the opposite shore of the Ohio River from the rest of the county.

The topography of Henderson County varies from level floodplain to gently rolling land. Mineral resources include oil and coal. The county is a very productive farming area with leading crops of corn, soybeans, wheat, and tobacco. Livestock is also raised there. In addition to the Ohio and Green rivers, numerous small streams that bisect the county include Lick, Canoe, Beaver dam, and Pond creeks.

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Hopkins County

1) Brief History

Hopkins County, the forty-ninth in order of formation, was created in 1806 from a portion of Henderson County and was named for General Samuel Hopkins, a Revolutionary War veteran and early settler of the region. The county seat is Madisonville.

The earliest inhabitants were prehistoric Native Americans who lived, hunted, and farmed there. One of their settlements was a rough stone structure on Fort Ridge, which has been destroyed by strip mining. Some of the early settlers were veterans of the Revolutionary War who received land grants from Virginia in the area southwest of the Green River. Among these was Friederick Wilhelm, Baron Von Steuben, the Prussian general who had instructed the Revolutionary army at Valley Forge in the winter of 1776-77.

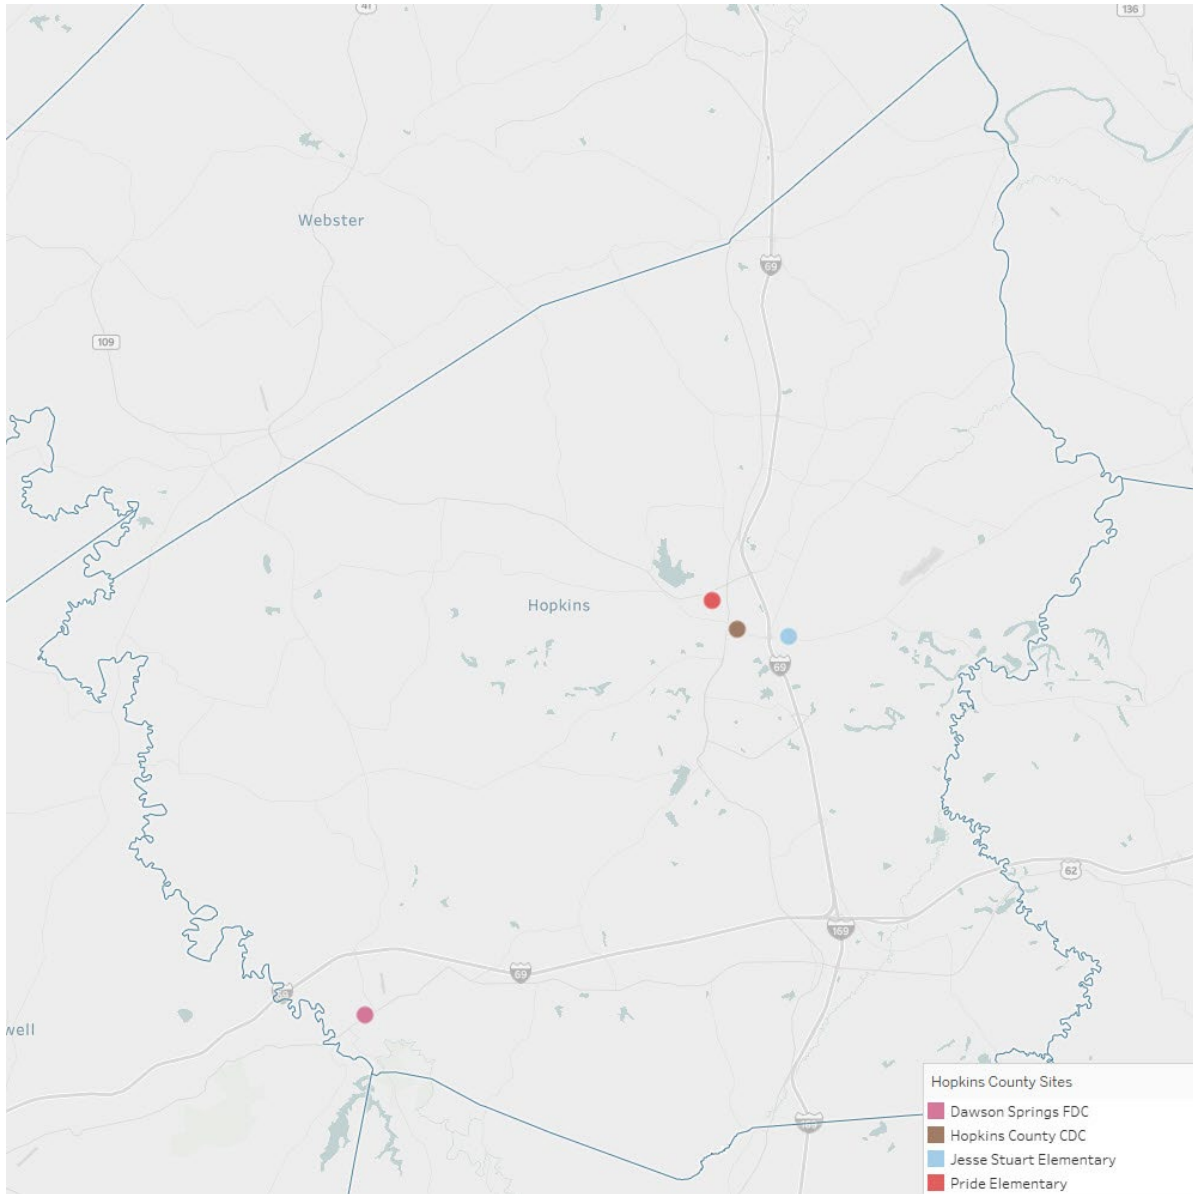

Farming was the major occupation in Hopkins County for most of the 1800s, with tobacco the leading crop. Around 1837 local blacksmith James Woolfolk found an outcropping of coal on his land. By 1970 Hopkins County was the second largest producer of coal in the Western Coal Field, after Muhlenberg, and the third-largest coal producer in the entire state after Muhlenberg and Pike counties. In 1971 the county also ranked fifth in Kentucky in oil production. Coal and oil-related businesses were major county employers by 1990.

2) Geographical Description

Located in western Kentucky, Hopkins County is bordered by Webster, McLean, Muhlenberg, Christian, and Caldwell counties, and has an area of 552 square miles. The topography ranges from flatlands along the broad river valleys of the Pond, Tradewater, and Green rivers, to hilly and rolling land in the southern and central parts of the county. Coal mines operate in the southern part of Hopkins County and agriculture is a mainstay in the northern part. Major crops are soybeans, corn, and tobacco. Along with coal, resources include oil and natural gas.

Livingston County

1) Brief History

The twenty-sixth county in order of formation, Livingston County, was created on December 13, 1798, from a section of Christian County. It was named for Robert R. Livingston, who helped to draft the Declaration of Independence and was minister to France, where he assisted in arranging the Louisiana Purchase.

Smithland, the county seat of Livingston, is named for John Smith and was settled in the late 1700's. The settlement slowly grew and became a stopping point for boats transferring passengers and produce. In its early days, the town had a reputation of being a lusty, bawling river town, full of unsavory characters. Soon however lots were bought by people of a much different and better character who built homes and established businesses including Inns and Taverns, some of which are reputed to have had tunnels used by escaping slaves.

The flatboats, packets, and riverboats on the streams provided the flavor of a riverside area. In the nineteenth century, many southern planters brought their families to Smithland in the summer to escape the heat of the deep South. Edward Zane Carroll Judson, who wrote western adventure novels as Ned Buntline, came to Smithland to live in 1845. In 1961 Metro-Goldwyn-Mayer used Smithland to film the Albany, New York, setting of the movie *How the West was Won*.

2) Geographical Description

Located in the "big rivers" section of western Kentucky, Livingston County is bordered on the north and west by the Ohio River, on the south by the Tennessee River, Kentucky Lake, and Lake Barkley. Adjacent counties are Crittenden, Lyon, Marshall, and McCracken.

Livingston County, which has an area of 312 square miles, has a topography which is divided between flood plains and hilly terrain. South of the Cumberland River are low rolling hills; north of the river the terrain is more rugged.

9) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Community

Health needs in the community:

- Obesity
- Cancer Rates
- High smoking rates
- Access to mental health services-currently poor structure for mental health/substance abuse
- Lack of counseling for patients and families regarding mental health
- Population is getting older – issues related to aging population (Alzheimer’s, need for specialized care, etc.)

Lyon County

1) Brief History

The 102d county in order of formation, Lyon County is named for Chittenden Lyon, a U.S. representative whose family settled in the area in 1801. The seat is Eddyville, which previously served in that capacity for Livingston and Caldwell counties.

Early settlers included David Walker, who in 1790 acquired a land patent where Eddyville is now located, and Matthew Lyon, who brought his family from Vermont in 1801 and established a shipyard there on the Cumberland River. Lyon constructed hulls of several ships for the U.S. Navy during the War of 1812.

Rumors of the construction of the Barkley Dam in the mid 1950's brought turmoil to the county as it would mean relocating the towns of Eddyville and Kuttawa. Lee S. Jones, a Louisville lawyer and Lyon County native, presented a plan to the Eddyville City Council. According to his plan, each person owning land in the towns (Eddyville and Kuttawa) to be flooded would receive a free lot in the new Eddyville site. This also applied to businesses.

Eddyville residents accepted his offer and on August 13, 1959, the official plat for the new town was filed with the county court clerk. The plat included 254 residential lots, 46 business lots, 28 acres (110,000 m²) for construction of a school and campus, city park, courthouse, health office, water works, and location of streets.

2) Geographical Description

Located in the western Kentucky waterlands and bordered by Caldwell, Crittenden, Livingston, Marshall, and Trigg counties, Lyon County has an area of 209 square miles. The topography is level to hilly. Thirty-four percent of Lyon County is in the Land Between the Lakes National Recreation Area. Farms occupy 33 percent of the land area, and 66 percent of farmland is in cultivation.

The county's extensive iron ore deposits contributed to the county's economy in the nineteenth century. Some of the ore was exported but a number of local furnaces to process the ore were built, one being the Suwanee furnace.

593	16	148	X	0.0%	47

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Pre & Post Assessment with Families

McLean County

1) Brief History

McLean County, the 103d in order of formation, was formed from portions of Daviess, Muhlenberg, and Ohio counties on January 28, 1854. The county is named in honor of Alney McLean, veteran of the War of 1812, state representative, and congressman (1835-39). The county seat is Calhoun.

The first white settlers in the McLean County area were in conflict with the Native Americans and some dug caves in the hillside near Calhoun for protection. Fort Vienna, the present site of Calhoun, was established in 1785 by Solomon and Henry Rhoads. Other communities include the incorporated towns of Island, Livermore, and Sacramento.

The Green River provided a deep channel for steamboat traffic in the nineteenth century. The first steamboat built on the Green River was completed at Rumsey in 1846 by the Jones Brothers. The river channel was improved greatly in the late 1830s, when a series of locks and dams was constructed. The river permitted farmers to trade with markets in the Ohio and Mississippi river valleys.

McLean County was the home of James Bethel Gresham, reputed to be have been the first United States soldier killed in World War I. Gresham died in the Battle of Somerville, November 3, 1917.

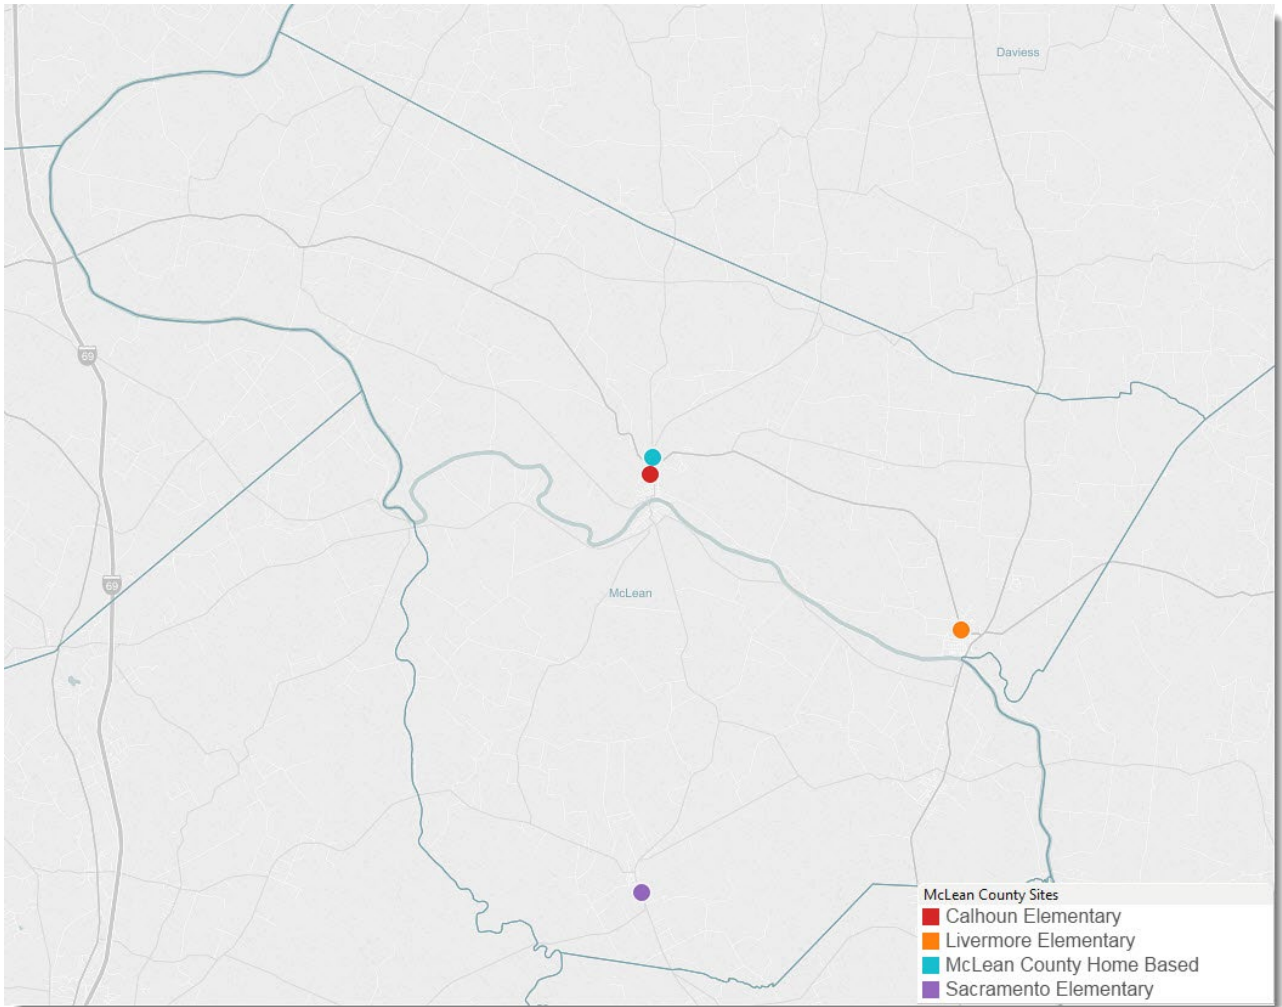

2) Geographical Description

Located in the Western Coal Field region of Kentucky, McLean County is bordered by Daviess, Henderson, Hopkins, Muhlenberg, Ohio, and Webster counties and has an area of 256 square miles. The Green River, the longest river entirely within the Commonwealth of Kentucky, forms a portion of its eastern border and dissects the county. Bridge crossings of Green River are at Calhoun, Livermore and west of Beech Grove. Green River is navigable throughout McLean County, with Army Corps of Engineers Lock and Dam #2 at Calhoun assisting boat navigation.

The topography of McLean County is level to rolling, with wide bottomlands along the Green River and its tributaries, including Pond River. Less than 25 percent of the land remains forested.

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Muhlenberg County

1) Brief History

The thirty-second county in order of formation, Muhlenberg County was formed in 1798 from the neighboring counties of Logan and Christian. Muhlenberg County was named after General John Peter Gabriel Muhlenberg, a clergyman, a soldier, and a politician of the Colonial, Revolutionary, and Post-Revolutionary eras.

White settlers came into the Muhlenberg County area in the 1780s and 1790s, many of them soldiers in General Muhlenberg's regiment. It was soon discovered that the region was rich in coal and iron deposits. One of the first coal mines in the county was established in 1820 on a farm on the Green River. Initially this coal was sold to local blacksmiths to fire their forges. As more deposits were found near the Green River, which provided easy access to other markets such as Owensboro and Evansville, Indiana, Muhlenberg's coal industry grew.

During the antebellum period, Muhlenberg County was a center of the Kentucky iron industry. In 1855 Sir Robert Alexander built the Airdrie Iron Furnace with the assistance of imported Scottish labor. Tobacco farming, especially in the county's northwest section, predominated during the 1850s. Grains and hogs were also raised.

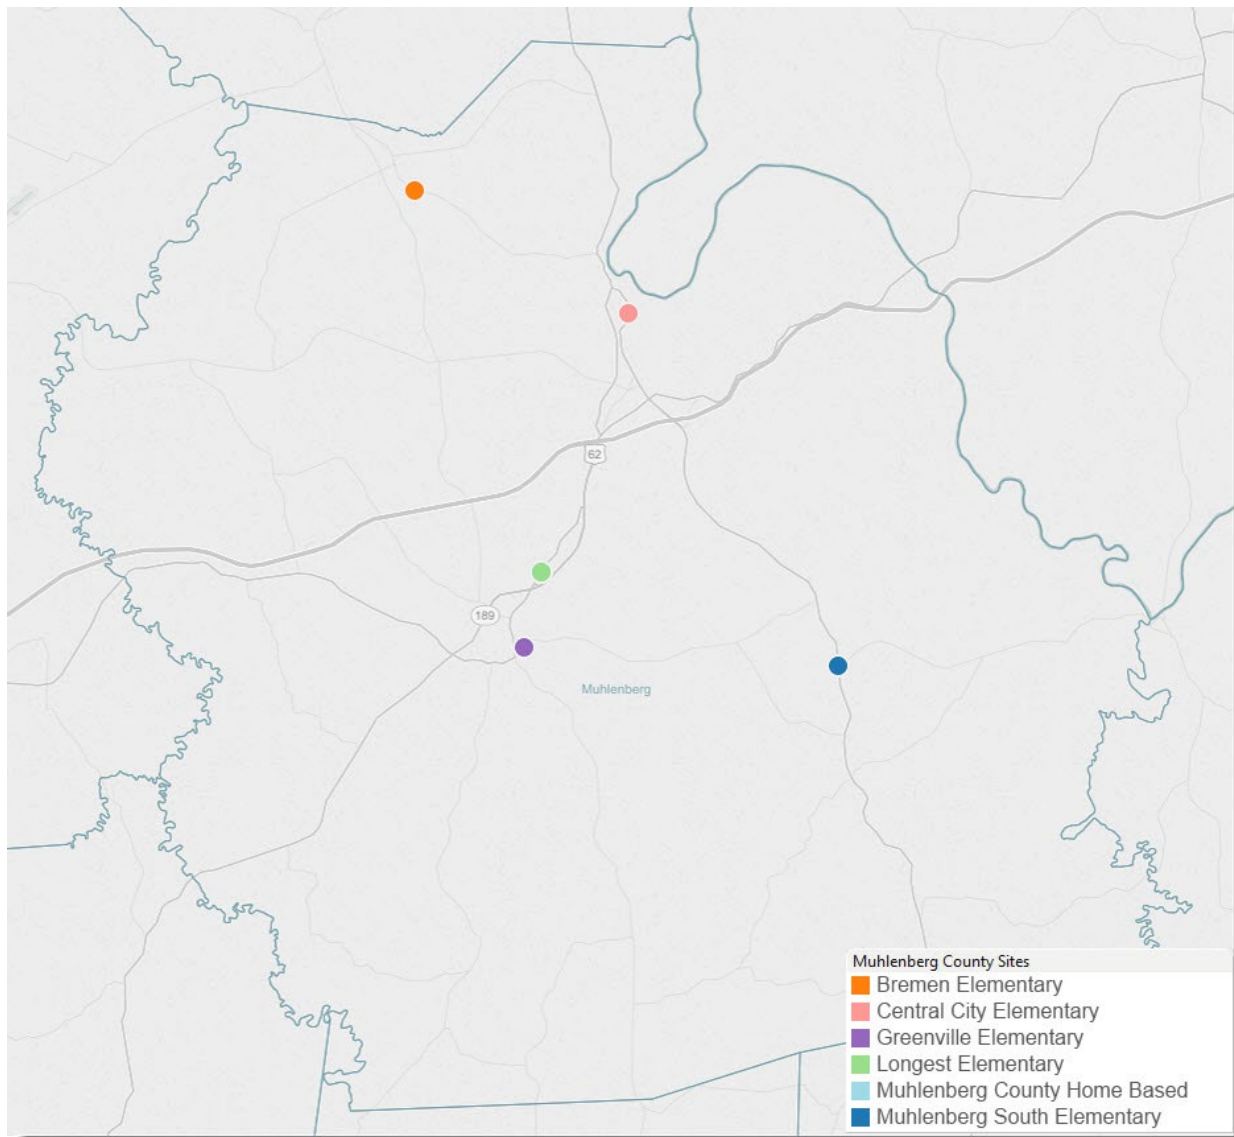

2) Geographical Description

Located in west-central Kentucky, Muhlenberg County is bordered by Butler, Christian, Hopkins, Logan, McLean, Ohio, and Todd counties and has an area of 478 square miles. The topography of Muhlenberg County is varied. The southern section of the county is somewhat rugged; the central portion of the county, extending toward its northern boundary, is more level. Over 40 percent of the county is still covered by hardwood forests, mostly of oak and hickory. The principal streams are the Green, Mud, and Pond rivers.

Lake Malone, spanning 788 acres in southern Muhlenberg County, provides water recreation such as swimming, boating, and fishing. The lake and the surrounding hardwood forest form Lake Malone State Park. The Paradise Park in Powderly is a replica of a 1920's coal-mining town and features the birthplace home of the late Merle Travis.

8) Strengths and Need of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Ohio County

1) Brief History

Ohio County is 35th in order of formation and was created December 17, 1798. The county was established from part of Hardin County on December 17, 1798, and was named for the Ohio River, which formed its northern boundary until Daviess County (1815) and Hancock County (1829) were created from it. Hartford is the county seat.

The first pioneers in Ohio County experienced several bloody encounters with Native Americans, starting in the 1780s. Daniel Boone and Joseph Barnett were among the first surveyors in the region. A Maryland Methodist minister, Ignatius Pigman, was a land speculator credited with bringing in a large number of settlers. One of the first physicians in the county, Dr. Charles McCreery, arrived around 1807.

River traffic down the Green and Rough rivers promoted the county's growth. Hartford became a river port and mill town on Rough River. On Green River the major towns were Smallhouse, Ceralvo, Rockport, and Cromwell. The river traffic was disrupted during the Civil War and dealt a serious blow by the advent of railroads to the county in the 1870s.

The county's incorporated cities in order of size were Beaver Dam, Hartford, Fordsville, McHenry, Rockport, and Centertown. The unincorporated village of Rosine, which was established in 1872 eight miles east of Hartford, is best known as the birthplace of Bill Monroe, the "Father of Bluegrass Music."

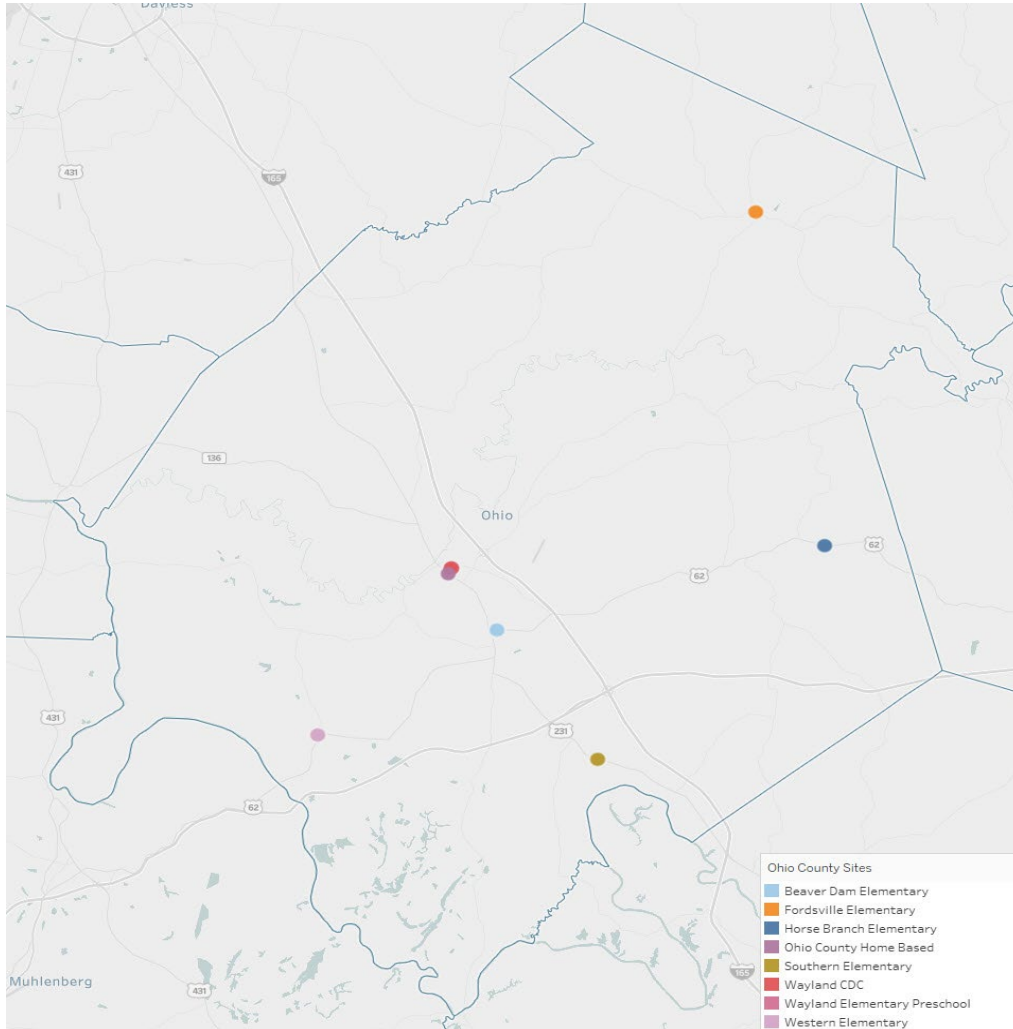

2) Geographical Description

Located in the Western Coal Field region of Kentucky, Ohio County has an area of 596 square miles, making it Kentucky's 5th largest county. It is bordered by Breckinridge, Butler, Daviess, Grayson, Hancock, McLean, and Muhlenberg counties. The Green River comprises most of the southern and western borders.

The topography of Ohio County is undulating and well suited for agriculture. County farms produce light and dark air-cured tobacco, soybeans, corn, cattle, and hogs. The principal waterways are Green River, Rough River, and various creeks.

Todd County

1) Brief History

Sixty-fourth in order of formation, Todd County in southwestern Kentucky was formed on December 30, 1819, from parts of Logan and Christian counties. The county was named in honor of Col. John Todd, the uncle of Mary Todd Lincoln, who was killed at the Battle of Blue Licks on August 19, 1782. Todd and his brothers Robert and Levi were instrumental in founding Lexington. Elkton, the county seat, was incorporated on May 18, 1820.

Among the early settlers were Franklin M. Chestnut, John Montgomery, and James Davis, who built a fort in 1783 on the West Fork of the Red River. By 1812, Joseph Robertson constructed a horse-powered mill on the Trenton Road. The first brick courthouse is said to be one completed by John Gray in 1821; its first floor served as the county court.

On June 3, 1808, Jefferson Davis, who later became president of the Confederate States of America, was born to Samuel and Jane (Cook) Davis at Fairview, seven miles west of Elkton. His birthplace is commemorated by a 351-foot concrete obelisk, completed in 1929. Robert Penn Warren, distinguished poet, novelist, and scholar, was born in Guthrie in 1905.

2) Geographical Description

Located in the Pennyrile region of southwestern Kentucky, the rectangular county has an area of 376 square miles. It is bordered by Christian, Muhlenberg, and Logan counties and the Kentucky-Tennessee line.

The topography is divided into two distinct areas. The southern half of the county is a sinkhole plain with gently rolling terrain; the more rugged area to the north contains higher elevations. The county was and is predominantly agricultural.

0	70	13	32.0	18	10.2%
---	----	----	------	----	-------

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Pre & Post Assessment with Families			
Assessment	1	2	+/-
Employment & Job Skills	3.1	3.1	-
Money Management	3	3	-
Safe and Stable Housing	4	3.7	▼0.3
Transportation Access	3.9	4	▲0.1

Trigg County

1) Brief History

Trigg County, the sixty-sixth county in order of formation, was created on January 27, 1820, and was formed principally from Christian County and a small portion of Caldwell. The county was named for Col. Stephen Trigg, a native of Virginia, who came to Kentucky in the fall of 1779 as a land commissioner. He was fatally wounded on August 19, 1782, in the disastrous Battle of Blue Licks. The county seat is Cadiz.

During its early years the county's major contact with the outside world was by steamboat on the waters of the Tennessee and Cumberland rivers. Landings at Linton, Canton, and Rock Castle were major shipping points. The coming of a railroad in adjoining Christian County and construction in 1901 of the Cadiz Railroad (abandoned in the late 1980s) to connect with a major line at Gracey was the beginning of the end for local river traffic. Improved highways, particularly the east-west U.S. 68, helped to move Trigg County into Kentucky's mainstream.

In the early 1930s the U.S. government acquired land for military and civilian projects, among them the construction of large dams on the Tennessee and Cumberland rivers, which formed Kentucky and Barkley lakes. The nucleus of the area's water playground, which attracts over a million visitors each year, is Lake Barkley State Resort Park. With the completion of I-24 through the northeastern section of the county, the lake's area became accessible to urban centers to the south, including Nashville.

2) Geographical Description

Located on the southwestern edge of the Pennyroyal region, Trigg County is bounded by the Tennessee state line to the south and by Kentucky Lake to the west and contains 421 square miles. Trigg County is surrounded by Calloway, Marshall, Lyon, Caldwell, and Christian counties.

The land in Trigg County is comparatively level in the east, with ranges of broken hills in the south and west. Tributaries of the Cumberland and Tennessee rivers that cross the western portion of the county include the Little River. The soil is limestone with a red clay foundation, and farmland in the river and creek valleys is rich and productive.

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Pre & Post Assessment with Families			
Assessment	1	2	+/-
Employment & Job Skills	2.9	2.9	▲0
Money Management	2.8	2.8	▼0

9) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Community

- Lack of health insurance
- Cost is a barrier to accessing care
- Financial problems in accessing mental health services
- Inadequate money to obtain medicine (26% of responses)
- Inadequate money to buy food (11% of responses)

Most important problems cited by a majority of participants included:

- Cancer – 71%;
- Obesity – 67%; and
- Drug abuse – 62%

The local Health Department also completed a five county needs assessment. The top five issues identified (not in rank order) included:

- Alcohol/drug abuse;
- Cancer
- Heart disease/stroke
- Obesity
- Prescription drug abuse

Union County

1) Brief History

The fifty-sixth county in order of formation, Union County was formed from part of Henderson County on January 15, 1811, and was named for the unanimous agreement of its citizens to create a new county. Morganfield is the county seat.

Union County was settled during the westward migration following the Revolutionary War. The very early settlers of Union County were squatters from Virginia. They did not generally remain and make permanent improvements, but, after hunting in the country for a few years, either returned to their Eastern homes or pushed further westward. They were followed in the early part of this century by Revolutionary officers, who held land grants under the United States Government for services in the Revolution.

After the fertility of the county was fully established, immigration set in from the eastern part of Kentucky. Oldham and Jefferson Counties furnished the largest share of the tide of immigration for these years. After this there was some immigration from Europe, especially around the coal regions, but, for the most part, it still came from the older counties of the State.

The river towns of Caseyville and Unionville were incorporated, along with the towns of Sturgis, Morgantown, and Waverly.

2) Geographical Description

Located on the western edge of the Western Coal Field, Union County has an area of 343 square miles. The Ohio River serves as the northern and western border for approximately 36 miles. In the southwest, Union County is separated from Crittenden County by the Tradewater River. Webster County borders the southeast section and to the northeast lies Henderson County.

The terrain varies from broad flat flood plains with elevations of less than 400 feet along the Ohio River to island-like hill masses that rise 150 to 200 feet or more above the valley flats. Principal streams are the Ohio and Tradewater Rivers.

Marshes near Slim Island, Dennis O'Man, and Goose Pond ditches and the wildlife areas of Higginson, Henry, and Jenny Hole-Timber Slough are managed to provide a haven for ducks and geese, as well as game in controlled hunting situations.

8) Strengths and Needs of Head Start Eligible Children and Families as Defined by the Families

Families in each county were given the opportunity to be involved in our Family Partnership Agreement process which included completing an individualized family goal, pre-assessment, and post assessment. The main areas for both assessments include: education, employment, housing, transportation, emergency assistance, child birth, relative child, family literacy, resources/training, volunteering, and community involvement. The purpose of the pre-assessment is to better understand the family's unique strengths and needs to determine if any follow-up of services or resources are needed.

Webster County

1) Brief History

Webster County, the 109th county in order of formation, was originally formed from Henderson County, Hopkins County and Union County in 1860. It is named for Daniel Webster, U.S. congressman, senator, and secretary of state.

The county seat of Webster County is Dixon. Revolutionary War veteran William Jenkins in 1794 established a stagecoach inn five miles north of the town's present site, on the old Indian trail between Nashville and St. Louis. When Webster County was formed in 1860, Dixon was platted from land owned by Ambrose Mooney. The town was incorporated on February 6, 1861, and named after Archibald Dixon, former lieutenant governor of the state (1844-48) and U.S. senator (1852-55).

Webster County's largest community is Providence. The town was founded by Richard B. Savage, who arrived in the vicinity from Virginia in 1820 with his eldest sister, Mary (Savage) Settler. Between 1820 and 1830, Savage laid out twenty-four town lots on land purchased from William Jenkins and built a trading post and residence. The settlement post office was established at Providence on October 16, 1828. The town name may have been copied from the city in Rhode Island; other accounts credit an old trader who thanked Providence for the Good Samaritans among local farmers.

2) Geographical Description

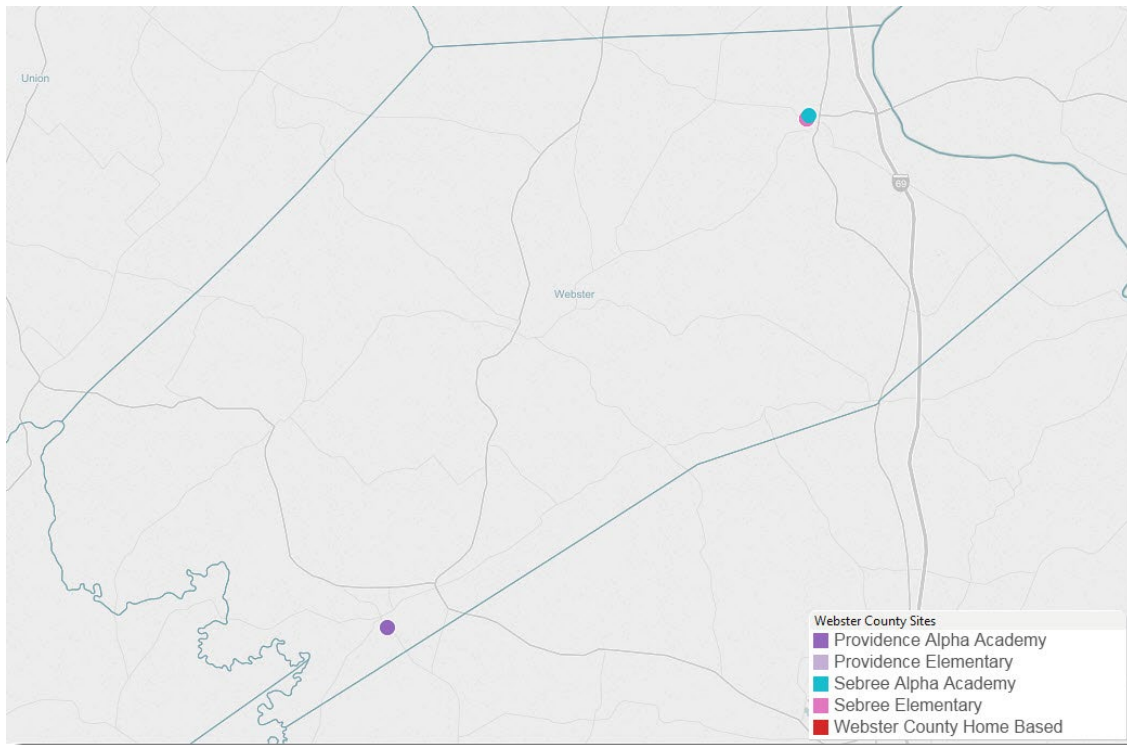

Located in the Western Coal Field region of the state and bounded by Union, Henderson, Hopkins, McLean and Crittenden counties, Webster County has an area of 336 square miles. The Tradewater River forms its western border and the Green River its eastern border. A ridge runs through the middle of the county and divides the watersheds of the two rivers.

Webster County is characterized by rolling hills and fertile creek bottoms. Since the end of the Civil War, the county's prosperity has been tied to its fertile soil and mineral resources.
